

Beneficial Ingredients to Soothe and Relieve

Antibacterial • Antifungal • Anti-Inflammatory

The LP3 Enzyme System In All ZYMOX Products

This powerful combination of enzymes features three naturally derived enzymes, lactoperoxidase, lysozyme, and lactoferrin. These are commonly found in milk products and when combined they work synergistically to destroy bacterial and fungal microorganisms without the use of antibiotics.¹

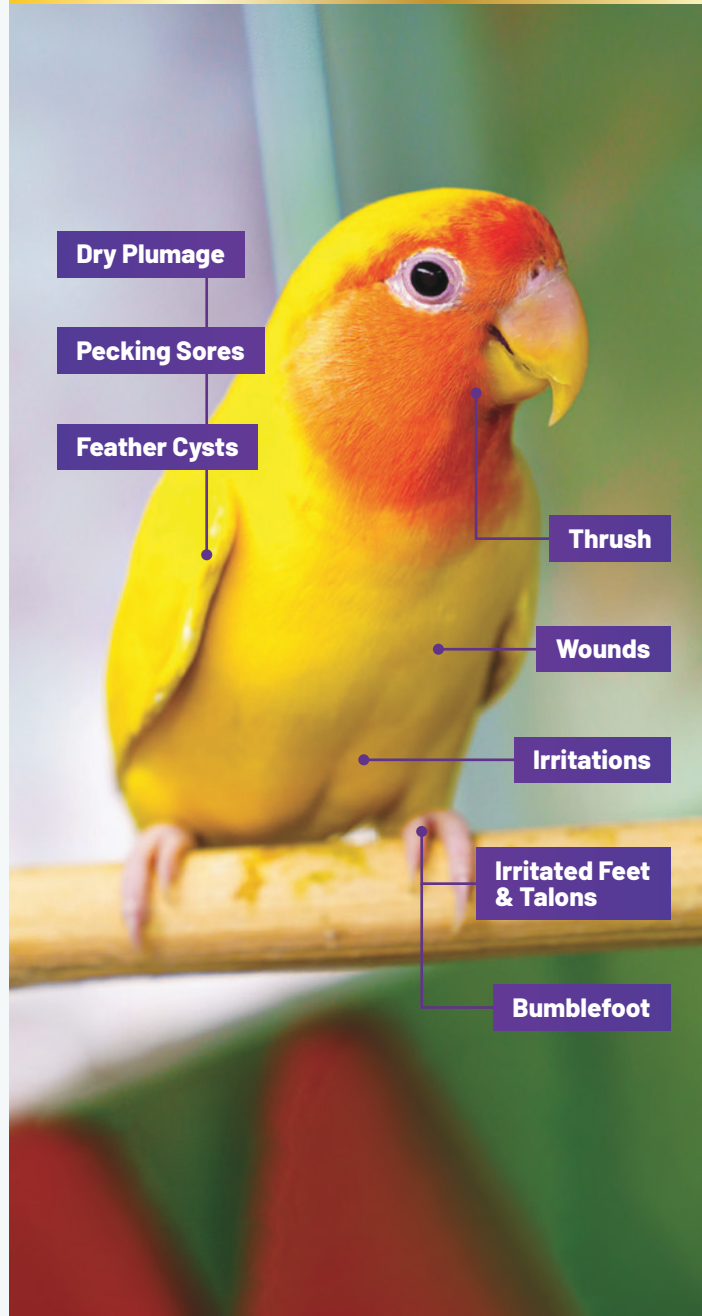

Aloe Vera and Zinc Gluconate In The Topical Spray

Aloe vera and zinc gluconate are natural ingredients with powerful skin and wound care benefits. Aloe vera is from a succulent plant known for its moisturizing and antibacterial properties and zinc gluconate is an essential mineral that plays a vital role in wound healing. Together they offer anti-inflammatory, hydrating, and antibacterial benefits.
